

B CHANDRA HASAN

Senior Mobile Application Developer

India | +91 9652220652 | channdrahasan5@gmail.com | linkedin.com/in/chandra-hasan-88023819b

PROFESSIONAL SUMMARY

Mobile Application Developer with 8+ years of experience designing, building, and maintaining native and hybrid applications for iOS and Android. Delivered 13+ mobile and cross-platform applications and 1 production iOS SDK, integrating 4+ biometric SDKs (Tech5, IDEMIA, Regula, Innovatrics DOT) for KYC/identity verification. Skilled in Swift, Kotlin, Java, Flutter, and Apache Cordova, with strong expertise in REST/XML API integration and end-to-end delivery (mobile, backend, and admin panel) across banking, government, and consumer domains.

SKILLS

Programming Languages: Swift, Objective-C, Kotlin, Java, Dart, HTML, JavaScript, TypeScript

Frameworks & Technologies: Firebase (Crashlytics, Push Notifications), Regula OCR SDK, IDEMIA Finger Capture SDK, Innovatrics DOT SDK, CoreData, SQLite, SwiftUI, Flutter, Apache Cordova, React Native, React JS, RESTful API Integration, Biometrics, Face Recognition, Fingerprint Authentication, CocoaPods, Swift Package Manager

Key Competencies: Push Notifications, Location Management, Auto Layout Constraints, Offline Storage Management, Motion Activity Integration, REST & XML API Integration, JSON Parsing, MVC/MVVM Architecture, Application Architecture, Performance Optimization, Code Review, Debugging & Maintenance, Version Control, Bluetooth Module, NFC Module, WIFI Module

Tools: Xcode, Android Studio, VS Code, GitHub, Postman

Database Management: SQLite, CoreData

AI-Assisted Development: Cursor, ChatGPT, Claude

Add-On Skills (Web & Deployment): PHP, MySQL, React JS, REST API Development, End-to-End Web Admin Panel Development, Web Hosting & Deployment (Hostinger, GoDaddy)

PROFESSIONAL EXPERIENCE

Senior Mobile Application Developer | Aptiway Technologies | Hyderabad, Telangana, India | Sep 2021 – Present

iOS Application Developer | Invensis Technologies | Tirupathi, Andhra Pradesh, India | May 2021 – Sep 2021

iOS Application Developer | Spgon Software Solutions | Rajahmundry, Andhra Pradesh, India | Apr 2018 – Apr 2021

Key Deliverables:

- Developed, maintained, and published 13+ native and hybrid mobile apps for Android and iOS, ensuring compliance with app store guidelines.
- Identified and resolved performance issues and bugs to improve app stability and responsiveness.
- Collaborated with cross-functional teams to design, implement, and integrate new features.
- Maintained code quality, organization, and consistency across multiple concurrent projects.
- Integrated biometric SDKs (Tech5, IDEMIA, Regula, Innovatrics DOT) and Firebase for push notifications, crash analytics, and offline storage.
- Built hybrid mobile applications using Apache Cordova and Flutter for Android and iOS.
- Connected applications to backend systems via REST and XML-based APIs, and integrated SQLite for local data storage.
- Designed responsive UIs and tested applications for consistent performance across devices.
- Managed app publishing on the App Store and Google Play Store, including versioning and release updates.
- Implemented biometric and KYC features (fingerprint, face recognition) for secure customer onboarding in banking and government applications.

- Coordinated directly with clients to gather requirements, deliver functional designs, and provide project status updates.

KEY PROJECTS

Aptiway FlowDesk (Ongoing)

Role: End-to-End Mobile & Web Developer

Technologies: React Native, PHP, MySQL, React JS

Description: Building an internal business/workflow management tool for Aptiway Technologies end-to-end.

Developed the React Native mobile app (Android & iOS, currently in progress), PHP REST API backend, and React JS admin panel. Deployed and hosted on Hostinger.

Emirates ID Integrated KYC – Native & Hybrid

Role: Android & iOS Developer

Technologies: Java, Swift, Flutter, Cordova, Firebase

Description: Created KYC applications for Android and iOS integrating Emirates ID and biometric authentication for identity verification in banking and government services.

Digital Onboarding Solution – Bank of Abyssinia

Role: Android Developer

Technologies: Java, Firebase, IDEMIA Finger Capture, Regula OCR

Description: Developed a KYC Android application for customer registration, integrating biometric authentication and ID verification with backend systems.

IDEMIA Wallet SDK – React Native SDK Development

Role: Mobile Application / SDK Developer

Technologies: React Native, TypeScript, JavaScript, Swift, Kotlin, IDEMIA Wallet SDK

Description: Engineered a React Native interface for the IDEMIA Wallet SDK, bridging native iOS and Android wallet capabilities. Delivered a sample application and complete technical documentation covering setup, configuration, APIs, callbacks, and troubleshooting.

GScience Research News

Role: End-to-End Mobile & Web Developer

Technologies: Flutter, PHP, MySQL, React JS

Description: Owned end-to-end delivery of a research and science news platform. Built the Flutter mobile app (Android & iOS) with news feeds, categories, bookmarks, authentication, and OTP-based password recovery, along with the PHP REST API backend and React JS admin panel. Deployed and hosted on GoDaddy.

Science & Technology Councils (STC)

Role: End-to-End Mobile & Web Developer

Technologies: Flutter, PHP, MySQL, React JS

Description: Owned end-to-end delivery of a platform for state Science & Technology Councils covering council information, events, news, and beneficiary statistics. Built the Flutter mobile app (Android & iOS), PHP REST API backend, and React JS admin panel. Deployed and hosted on GoDaddy.

APCOST

Role: End-to-End Mobile & Web Developer

Technologies: Flutter, PHP, MySQL, React JS

Description: Owned end-to-end delivery of the APCOST citizen application covering authentication, schemes, programs, events, favorites, and registrations. Built the Flutter mobile app (Android & iOS), PHP REST API backend, and React JS admin panel. Deployed and hosted on GoDaddy.

Timesheet Mobile iOS

Role: iOS Developer

Technologies: Objective-C, Firebase

Description: Delivered a timekeeping and location-tracking application for healthcare and transportation industries, with push notifications and crash analytics.

JNTUK App – Android

Role: Android Developer

Technologies: Java, Firebase

Description: Developed an application for JNTUK University to view news, notifications, and events, with real-time push notifications.

Kanna BJP – iOS

Role: iOS Developer

Technologies: Swift

Description: Designed and developed an application for the BJP State President providing updates on events and programs. Managed design, testing, and App Store publishing.

APSPDCL (State) – iOS

Role: iOS Developer

Technologies: Objective-C

Description: Implemented a utility application for APSPDCL customers to register complaints, request connections, and view usage and billing.

My Contact – Personal iOS

Role: iOS Developer

Technologies: Swift

Description: Shipped a contact management application for personal and business use, with contact syncing and a user-friendly UI.

APCPDCL (Central) – iOS

Role: iOS Developer

Technologies: Objective-C

Description: Built a utility application for APCPDCL customers to register complaints, request connections, and track usage and billing.

PRODUCTS

BioHaazNetwork iOS SDK — v1.0.5 | Swift

Description: Built and released a reusable iOS networking framework for reliable, high-performance API communication and developer debugging. Features include request/response interceptors, structured API logging, performance monitoring, offline request queuing, automatic retry handling, multi-environment configuration, and file upload/download with progress tracking.

Technologies: Swift, URLSession, REST APIs, Swift Package Manager
